

A black USB cable is standing upright in a patch of soil. The cable's head is at the top, and the cord extends downwards into the ground. Several small green plants with yellow buds are growing around the base of the cable. The background is dark and out of focus.

How much do you depend on technology?

Lets's watch a video!

What is your real opinion?

What are your impressions of the lesson?

What did you find interesting/difficult?

What new things have you learnt?

Home Assignment

Imagine that you are doing a project on the introduction of 5G technology worldwide.

You have collected some data on the subject – the results of a 2020 survey by the GSMA Intelligence organisation covering 5G expected spread by 2025 statistics (see the chart below).

Comment on the data in the chart and give your personal opinion on the subject of the project.

Write 200–250 words.

Use the following plan:

- make an opening statement on the subject of the project work;
- select and report 2–3 main features;
- make 1–2 comparisons where relevant;
- outline a problem that can arise with introducing 5G worldwide and suggest the way of solving it;
- draw a conclusion giving your personal opinion on the benefits and risks of 5G.
